Fax: +1 415-704-3441
Email: ken@rehor.com

I develop and evangelize voice web architecture, VoiceXML, and related technologies. I'm one of the original authors of VoiceXML, and I'm the principal founder of the VoiceXML Forum. I'm Chair of the VoiceXML Forum's Conformance Committee, where we're building a VoiceXML conformance program, standard test suite, and testing infrastructure to compare VoiceXML platforms, tools, and applications. In the Worldwide Web Consortium (W3C) Voice Browser Working Group (VBWG), I'm a co-editor of VoiceXML 2.0; I design new telephony call control features as part of the Call Control subgroup. In 2001, Speech Technology Magazine's readers voted me as one of the 20 most influential people in the speech technology industry. I serve on the Editorial Advisory Board of the magazine.

I've been interested in telecommunications for many years. I was a Member of Technical Staff in the Software Production Research Department in the Communications Software Research Center of the Bell Laboratories Research division of Lucent Technologies from 1992 through 2000. In 1995 I helped build the first web-based telephony platform, PhoneWeb, programmed with what we called the Phone Markup Language (PML). Years later, I started the VoiceXML Forum in March 1999 with AT&T, IBM, and Motorola to develop a standard voice telephony markup language based on our research and products. On August 25, 1999, we released the first draft (0.9) of the VoiceXML specification. On March 7, 2000, we announced the publication of the VoiceXML 1.0 specification. Soon thereafter, we submitted VoiceXML 1.0 to the W3C, which was formally acknowledged on May 22, 2000 when the W3C Voice Browser Working Group announced it had voted at its May 10-12 meeting in Paris to adopt VoiceXML 1.0 as the basis for the development of a W3C dialog markup language.

As a Software Architect at Nuance Communications, I investigated architecture for the next-generation Voice Web and developed new VoiceXML features for NVP (nee VWS). I've worked as a consultant at AT&T Labs Research in Florham Park, NJ, where I designed new telephony features for VoiceXML, and led a project to demonstrate new VoIP-based telephone services for the AT&T Network. In 2000, I worked as CTO at Enuncia Communications where we built an innovative and robust VoiceXML server along with some cutting-edge tools.

For more information about my work related to VoiceXML, see my list of external publications, talks, and patents. For a glimpse of the VoiceXML industry, see my *World of VoiceXML* site.

K. G. Rehor and T. J. Ball, *Access-Independent Service Creation for the Internet and World Wide Web*; in the proceedings of the Workshop on Research Directions for the Next Generation Internet May 13-14, 1997, Vienna, Va. USA

D. L. Atkins, et. al., *Integrated Web and Telephone Service Creation*; Bell Labs Technical Journal, Winter 1997

SELECTED TALKS

- VoiceXML Forum Users Group Meeting (May 08, 2002, San Jose, California):
    - *VoiceXML Forum Conformance Activities*
    - *Voice Browser Interoperation*
- VoiceXML Planet 2002 Conference & Expo (March 20-22, 2002, San Jose, California): *Leveraging VoIP networks for VoiceXML Applications (PDF)*by RJ Auburn and Ken Rehor
- SpeechTek 2001 (October 23-25, 2001, New York City): *Where is VoiceXML Going? (panel moderator)*
- VoiceXML Forum Users Group Meeting (April 05, 2001, San Jose, California): *VoiceXML Forum Conformance Activities (PDF)*
- Telephony Voice User Interface Conference (February 07, 2001, Scottsdale, Arizona): *Requirements for an Effective VoiceXML Platform*
- SpeechTek 2000 (November 2000, New York City): *VoiceXML and the Voice-enabled Web (PDF)*

- Internet Telephony Expo (October 2000, San Diego, California): *Introduction to VoiceXML*
- AVIOS 2000 (May 2000, San Jose, California): *Building Speech Recognition Telephony Applications with the Voice eXtensible Markup Language (PDF)* (afternoon tutorial)
- CSUN Center On Disabilities Conference 2000 (March 24, 2000, Los Angeles, California): *VoiceXML And TelePortal: Using Speech Recognition To Access Web-Based Information Via Standard Telephones, by Kenneth Rehor and Jania Sajka*
- Loyola University of Chicago, Department of Mathematics and Computer Science
  - CS388: Internet Programming – guest lecturer Fall 1998, Spring 1999, Fall 1999 (Taught web-based telephone service programming using PML and TelePortal)

PATENTS

- Rehor, et. al. US 6,393,107: Method and apparatus for creating and sending structured voicemail messages *(issued May 21, 2002)*
- Rehor, et. al. US 6,240,391: Method and apparatus for assembling and presenting structured voicemail messages *(issued May 29, 2001)*
- *Numerous other patents pending in US and other countries*
